Course Description

- Imaging and Video concepts and formats
- Shot types and camera movements
- Pre-planning and storyboarding; video procedures and limitations
- Editing and video post-production
- Introduction to digitization; sizing, looping, technical limitations and formats
- Using digital cameras
- linear and non-linear editing; differences between digital video and film
- Digital audio technology and audio editing

Instructor

Tao Papaioannou

Course Aims and Objectives

This course is an exploration of the experimental artistic practices utilizing computer and digital technologies: digital imaging, video and audio. The course also delves into alternative applications of the technologies, and looks at the past and the future in the hopes of gleaning more insights into what is fast-becoming a major growth area of visual media. Students who complete this course should be able to create a web page with imbedded music, digital video, and other audio media. They should be able to create an interactive multimedia presentation.

Teaching Methods

The course is delivered through a mixture of lectures, studio presentations, studio tutorials and practical exercises and assignments.

Course Teaching Hours

42 hours. The course is delivered during the fall and spring semesters in 14-weeks (3 hours/week).

Evaluation and Grading

Homework: 20%
Mid-Term: 30%
Final Exam: 50%

Readings and Resources

Required Textbook

There is no required textbook for this course
